- Red/Green channel marker styles
- Choice of lettering and graphics
- Lifting eyes

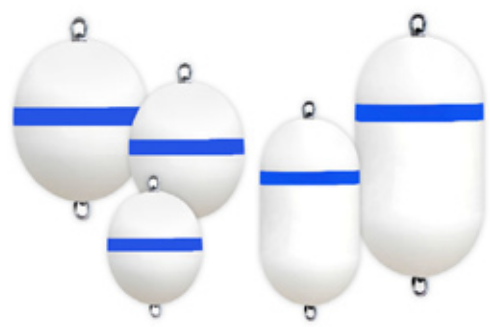

Solar Powered Marine Lights

- Ranges starting from 1NM on up
- Choice of colors and flash patterns
- Mounting hardware included

Marina Mooring Buoys

Protect shorelines, natural habitats, coral reefs and other boats by giving boaters an alternative to anchoring. By anchoring to the seabed by lines or chains, mooring buoys are applicable for all types of vessels, floating platforms or aquaculture structures. To avoid confusion with navigation aids, mooring buoys have a distinctive color scheme – white with a blue horizontal band.
